

Dear *Name*,

I'm a M1 General Physics student (Master of Physics, University Paris-Saclay). I'm very interested in and I would like to ask whether it would be possible to do an internship (stage) in your research group. The internship will take place between middle of April and end of June and it should be minimum 2 months.

Add here why you are motivated by the activity of that group

We also need to prepare a research project in a research group. This will take place between 14 January and end of March. We have one day free (Thursday) for this. I would also like to ask whether you would have a research subject for me, and a possibility for such project in your group. The research project can be related or not to the internship.

I have attached my CV and also a letter from the directors of the M1 General Physics program, Tiina Suomijarvi (tiina.suomijarvi@u-psud.fr) and Gregory Moreau (gregory.moreau@u-psud.fr).

Please, contact them if you need any further information on our teaching program.

I would kindly ask you to answer as soon as possible so that I can prepare my study plan for the second semester.

Sincerely yours,

Name
